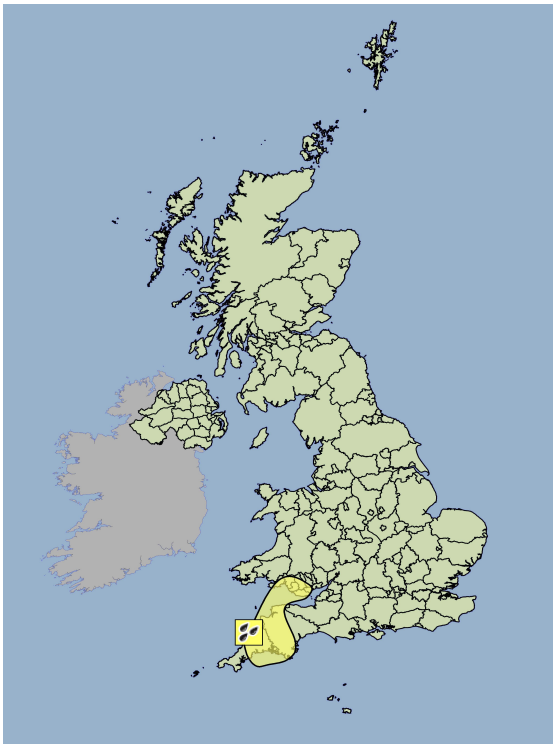
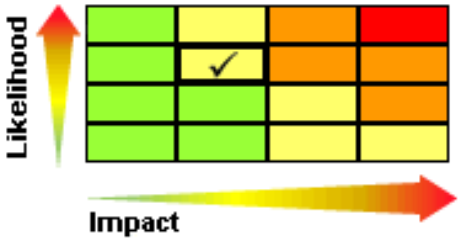
National Severe Weather Warning Service





Chief Forecasters Assessment
An active frontal system will move northwards across southwest England and Wales this morning. It is likely to bring 15-25 mm of rain fairly widely, falling in some 6 hours, with a risk of over 40 mm on higher ground.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **04:40 on Mon, 21st Oct 2013** until **10:00 on Mon, 21st Oct 2013**

Heavy rain is likely to affect parts of southwest England and south Wales this morning accompanied by strong southerly winds.

The public should be aware of the risk of localised surface water flooding, more especially in urban areas and affecting roads around the rush hour.

This warning is an update to that issued yesterday evening to include parts of south Wales.

The heavy rain should ease around the middle of this morning but more heavy rain is likely later today for which a further warning may be required. Therefore the public are advised to monitor the web site for updates.
